

AWS Cloud Readiness Assessment

AWS Cloud Readiness Assessment from Anaeko

Define a bold, achievable vision for cloud adoption, with clear unambiguous business outcomes that align with organisation goals and address stakeholder needs. Anaeko's fast assessment ensures clear alignment between technology projects, measurements of value, and outcomes. Define a strategy with actionable next steps and risk mitigation. Create a plan with quick wins and roadmap for prioritised projects.

Anaeko's Cloud Readiness Assessment delivers

Engagement

Change management, in particular Stakeholder engagement, is critical for frictionless transition to cloud.

Value

Migration strategies for the cloud, consider value for money options and balance risks against rewards.

Success

Our approach prioritises projects against agreed assessment criteria to maximise impact.

Choose Anaeko as your cloud adoption experts

We recommend our **Cloud Readiness Assessment** to deliver a clear vision and strategy for running your applications efficiently on AWS Cloud. Our clearly documented recommendations are founded on business outcomes, and they set out prioritised project plans, business justification, and measurements of success. With our **AWS Cloud Readiness Assessment** we will:

- 1 Define:** an initial half-day workshop with stakeholders to define strategy, based on a clear and consistent assessment framework.
- 2 Plan:** our analysis of your digital estate with stakeholders, considers organisational alignment, skills readiness plan, and cloud adoption plan. Complete in 2 weeks or more depending on size of the estate.
- 3 Deliver:** socialise, expand and refine plans for stakeholder agreement on prioritised delivery roadmap, business cases, and measurements of success.

Anaeko's **Cloud Readiness Assessment** will deliver a cloud adoption strategy for your digital estate that has stakeholder buy-in and that aligns with your business goals. It delivers clear plans that cater for skills, business priorities and economics.

With an AWS Cloud Readiness Assessment from Anaeko you will:

Optimise your
Cloud Adoption
Journey

Foster
Stakeholder
Support

Focus on
Business
Outcomes

Align
Technology
with Outcomes

Optimise Cost
of Service
Delivery

6 key areas of Anaeko's Cloud Readiness Assessment:

Economics: Understanding total cost of ownership is important for budget approval and allocation. Major aspects are upskilling IT staff and cost optimisation for AWS cloud hosting environments.

Empowerment: Careful identification of all stakeholders and inclusive engagement ensures all perspectives and ideas are heard and included in well-conceived, clearly documented strategy and plans.

Alignment: Technology recommendations are aligned with business goals and staff skills.

Strategy: We follow industry best practice with strategies for application migration to the AWS Cloud. Analysis of benefit versus cost and risk, business events, and system inter-dependencies, inform plans and prioritisation for groups of applications and data.

Combat Inertia: Many cloud transformation projects suffer from inertia that leads to inefficiency and unnecessary expense. For larger digital estates our rapid assessment methods identify and plan for opportunities to start small, with low-risk quick-win projects that build stakeholder confidence and generate momentum.

Standardisation: Rationalisation and standardisation on technologies and mechanisms is important in respect of staff skills and training, cost efficiency and avoiding vendor lock-in. Anaeko consults with the organisation's standard bearers and documented principles/guidelines when formulating recommendations.
