

AWS Reporting Accelerator

AWS Reporting Accelerator from Anaeko

Gain valuable insights from data you already have, from a flexible reporting platform designed and delivered for you by Anaeko in a 1-to-3-month timescale. Move from being spreadsheet slaves to Business Intelligence (BI) masters, and confidently make data-driven business and operations decisions based on accurate KPIs and future trend analysis. We provide a solution to suit all budgets and deliver online reports that will delight users.

Choose a BI Reporting Solution that Delivers

Speed

Agile delivery focused on your priorities. Combined data from up to 5 sources in 3 high-priority reports.

Accuracy

Gain confidence with reporting and understand limitations with your data.

Value

Data processing, storage, and presentation is cost-optimised, also focused on accessibility and security.

Choose Anaeko for your AWS Reporting Accelerator

We recommend our **AWS Reporting Accelerator** to gain instant insights from your data and to identify opportunities to build a data-driven organisation. Rapidly achieve an accessible, secure, trusted reporting platform that your users will love.

With our **AWS Reporting Accelerator** we will:

- 1 Assess:** we present recommendations on achieving your reporting goals, based on User Research for reporting gap analysis and a Data Discovery to explore opportunities.
- 2 Design:** Solution Architecture based on blueprints and templates for automated data ingestion, cleansing, transformation, modelling, and reporting based on low-maintenance AWS products and services.
- 3 Implement:** deliver online reporting on a secure data store, transfer knowledge to the users, test effectiveness, and iterate for enhancements.

An **AWS Reporting Accelerator** from Anaeko will deliver a future-proof foundation to build a data-driven organisation, where your people have secure online access to useful, timely, and accurate reports.

With an AWS Reporting Accelerator from Anaeko you will:

Gain
Instant
Insights

Increase
Report
Accessibility

Improve

Efficiency

Benchmark
and Track
Trends

6 Key Benefits from our Reporting Accelerator

Data-Driven Organisation: Benchmark business and operational performance against Key Performance Indicators (KPIs) and measure improvement against targets.

Confident Decisions: Reporting that is fit-for-purpose based on user research and on data quality you can trust.

Insights and Learning: Derive deep learning on operational and business drivers, and track trends from existing data.

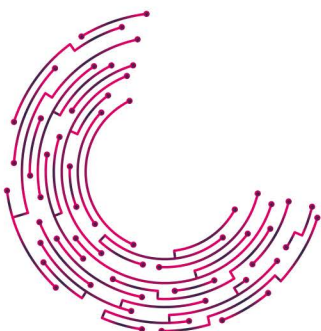

Accessible: Cater for all users in compliance with W3C WCAG 2.0 accessibility standards and data security compliance with reports built on your preferred BI tool: Amazon QuickSight, Amazon managed service for Grafana or Microsoft Power BI on AWS data store.

Extensible: Modifying or adding new reports or data sources to the established baseline reporting platform is relatively simple.

Reliable: Benefit from a highly fault-tolerant architecture, based on AWS platform-as-a-service products that are self-healing.
